Dear Professional,

Thank you for taking the time to review this packet with exciting information regarding wireless two way communications. I take great pride in our professionally engineered network of radio towers and equipment that allows businesses state-wide to use Push-To-Talk communications at reduced costs versus expensive Nextel™ prices or other carriers. Our company has the opportunity to offer lower costs because we own our radio towers that serve the NJ, PA, and MD areas while other companies lease space to share coverage territory. As you may already know, our service is a walkie talkie feature that spans Wide Area Coverage from NJ to PA to MD. You will enjoy our wireless professionals and our fast friendly service. And it only costs \$17.00-\$21.00/month per unit. This rate is a flat rate which means you have unlimited airtime and no night or weekend charges. Several radio's are available ranging from portables to mobiles. No annual contracts are required and you will not incur any FCC charges, federal charges, or bogus charges like other carriers. Just flat rate monthly charge and NJ state sales tax apply. Call today for prices on two way radio's and a free trial period of our wireless service. From one professional to another, I hope you realize the advantage of your potential savings and act today. I look forward to doing business from you in the future.

Respectfully Submitted,

Gary Bendy,
Tekk Comm Communications
