EMERGENCY SERVICE

WWW.TEKKCOMM.COM

WELCOME

Welcome to Tekk Comm Communications. As a new customer, you will find that our services exceed your expectations.

Our services include sales and service of Motorola, Kenwood and Uniden two way radio's along with many other products. In addition, Tekk Comm also provides professional mobile radio installation as well as a full service facility complete with inventory and trained technicians.

Tekk Comm specializes in System Design of VHF and UHF communications for public safety and government. Among design, we provide planning, tower construction, equipment installation and preventive maintenance programs to ensure reliable communication. If you are considering a new communication system, call our office today to discuss your requirements.

Our services are offered to public safety, government agencies, and private businesses in New Jersey.

Public Safety

Tekk Comm's prompt response for service ensures that communication networks from portable radios to dispatch consoles remain functional for all emergency responders.

Business

Taking advantage of our reliable two-way network keeps overhead costs low while effectively communicating with your staff. Call for more information today.

Transportation

Along with providing quality sales and service, many school buses rely on our wide area radio coverage to ensure safety while transporting New Jersey's children.

For more info: Call our office today.

Wide Area Radio Coverage

Tekk Comm has constructed a proven, wide area two way radio network for businesses in South Jersey. Similar to NEXTEL™, our service requires mobile or portable radios such as Kenwood or Motorola and subscriber-based **unlimited airtime coverage**. Each customer enjoys **instant communication** and guaranteed private frequencies.

Unlike NEXTEL™, our service, as little as **\$17.00/unit** per month reduces overhead, and provides clear communication with fewer dead spots. Many businesses with small and large fleets alike have found our service to be more cost effective than cell phones.

COVERAGE AREA - NEW JERSEY
